SharePoint Consultant, providing solutions based on SharePoint since 2002, more than 10 enterprise deployments and developments tope of SharePoint 2003 and 2007 as leader.

10 years experience in IT industry, last 6 years focused on research and development of Portal solutions especially on SharePoint technology. Excellent knowledge on infrastructure and unstructured web applications. Able to lead multiple engagements of enterprise projects at the same time and delivering cutting edge solutions to clients based on Microsoft's products and technologies. Consult with clients to understand their business needs, gathering requirements and overseeing implementation by features and functionality of SharePoint 2007. Acts as a senior technical advisor to proposed solutions and presenting these to the managers, evolving to a perfect solution and achieving them to sign a contract.

Accomplished SharePoint Projects

*Dubai – UAE
(Feb 2008 – June 2008)*

I had an MOU as a SharePoint Consultant by one of Microsoft Gold Partners located at Dubai Internet City, its Jumeirah Extranet Portal, currently 15,000 users on SharePoint; we developed Extranet Portal based on MOSS 2007 for a restaurant chain at Dubai.
<http://www.sharepointsolutions.ir/en-uk/projects/Pages/Jumeirah.aspx>

*Dubai - UAE
(Aug 2007-April 2008)*

I signed a contract between Dubai Hospital and my own company, **SharePoint Solutions Persia**, It's a Multilanguage Internet facing portal site based on MOSS 2007. I am architecting Intranet Portal also based on MOSS 2007. We are planning for physician's personal

sites, e-journals and SLK deployment.

Dubai –UAE
(Jan 2007- Oct 2007)

We used MOSS 2007 Enterprise Edition to crawl external databases using Business Data Catalog. It's a Portal Site and Ministry of Economy wants to search especial peoples and companies' tax information. We connected BDC to multiple databases, more than 3,000,000 records to crawling contents, so management is able to do advanced search and find tax information of requested companies. Take a look at screen cast here:

<http://www.sharepointsolutions.ir/en-uk/projects/Pages/BDC.aspx>

Chizar Enterprise Archiving
(03/2007–04/ 2008)

It's a governmental archiving system based on WSS 3.0, we are planning to archive more than 1.5 TB documents and indexing them based on MARC XML & Dublin Core Standards. It has a custom thesaurus for Persian keywords implemented by built-in features of WSS and make results in search.

Social Security Research Institute (SSRI)
(01/ 2007 –12/2007)

It is a research center and we are providing whole company workflows based on SharePoint 2007. The main functionality of this organizational portal is: all departments have a workspace for sharing and collaborations included Project Tracking applications, HR Management workflows and proposals and contract workflows.

<http://www.sharepointsolutions.ir/en-uk/projects/Pages/ssri.aspx>
